

STEM

Want to know more about the human body? Do you have an interest in medical field careers, health and fitness careers, or biological research careers? Anatomy and Physiology is the place to be! This course focuses on the structure and function of the human body and the interaction of body systems for maintaining homeostasis. Topics will range from basic organization of the body, biochemistry, major body systems, as well as, the impact of diseases on systems of the body. In addition, we will investigate and report the uses of various diagnostic and therapeutic technologies associated with different systems of the body.

If you have any questions, or would like additional information, please refer to the MFISD CTE Homepage for the STEM Science Pathway teacher contact information.
